

## Pasos antes de empezar a trabajar (sad).

- **Actualizar rama de desarrollo:**
  - git switch develop
  - git fetch
  - git merge
- **Fusionar los cambios de la rama de desarrollo en tu rama local:**
  - git switch NombreRamaLocal
  - git merge develop

## Pasos antes de hacer un push (sad).

- **Rama local:**
  - Commit de los cambios:
    - git add .
    - git commit -m "commit info"
  - Cambiar a la rama de desarrollo:
    - git switch develop
- **Rama develop:**
  - Actualizar la rama por si hay nuevos cambios en la rama remota:
    - git fetch
    - git merge (solucionar conflictos en caso de que los haya)
  - Fusionar los cambios de tu rama local en la rama de desarrollo para subirlos:
    - git merge NombreRamaLocal
    - git push

## Copiar archivos de *Descargas* al directorio *assets* del proyecto local (sad).

- mv ~/Descargas/\* ~/Escritorio/PodProse/application/src/assets/

## Simbología para commits (sad).

| Commit type              | Emoji  |
|--------------------------|--|
| Initial commit           |  :tada:               |
| Version tag              |  :bookmark:           |
| <b>New feature</b>       |  :sparkles:           |
| <b>Bugfix</b>            |  :bug:                |
| Metadata                 |  :card_index:         |
